

PUBLIC NOTICE

TOWN OF SEABROOK

Mosquito Control

The Mosquito Control program begins the week of April 9, 2018 in the Town of Seabrook. Crews from Dragon Mosquito Control will be checking swamps, salt marshes, woodland pools, ditches, storm drains and other shallow, stagnant water for mosquito larvae. When mosquitoes are found, the following insecticides may be used:

VectoBac (Bacillus thuringiensis israelensis)	CocoBear MLO (mineral oil)
Altosid (methoprene)	AquaBac 200G (Bacillus thuringiensis israelensis)
Fourstar Bti CRG (Bacillus thuringiensis israelensis)	Duplex-G (Bacillus thuringiensis israelensis, methoprene)
BVA 2 MLO (mineral oil)	

Control of adult mosquitoes may be done at the following locations in preparation for Old Home Days Celebration in August, for sporting events, to reduce nuisance mosquitoes or if Eastern Equine Encephalitis or West Nile Virus is found in or near Seabrook:

Seabrook Elementary & Middle School	Governor Weare Park
Community Center	Seabreeze Village
Veteran's Memorial Park	Department of Public Works

Adult mosquito control will be accomplished using one or more of the following products:

Cross Check Plus (bifenthrin)	Permanone (permethrin)
Duet (sumithrin & prallethrin)	Zenivex (etofenprox)
Essentria IC ³ (rosemary oil, geraniol, peppermint oil)	

A truck mounted sprayer could also be used to disperse Duet (sumithrin & prallethrin) or Zenivex (etofenprox) along roadways during a public health threat. It is not possible to predict if emergency spraying will be necessary. The spray schedule is based upon mosquito surveillance data, disease test results and weather conditions. Further communication will be given if emergency spraying is going to take place.

Residents who do not want their wetlands treated may use our No-Spray Registry online at www.dragonmosquito.com/no-spray-registry or write to Dragon Mosquito Control, P.O. Box 46, Stratham, NH 03885. Be sure to include your name, physical address, phone number, a description of your house and acreage.
